-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

RESTRICTION REQUIREMENT

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-24, drawn to a container packaging machine with a turner/diverter for the containers, classified in Class 53, subclass 531.

Group II. Claims 25-31, drawn to a container packaging machine classified in Class 53, subclass 43.4..

The inventions are distinct, each from the other, because of the following reasons:

The inventions of Groups ~ and ~ are related as **combination and subcombination**. A restriction requirement is based on the presumption that all claims of record define patentable inventions. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for its presumed patentability and (2) that the subcombination has utility by itself or in other combinations. (See MPEP 806.06(c)). In the instant case, a comparison of combination claim ~ and subcombination claim ~ provides evidence that the combination, as claimed, does not require the particulars of the subcombination, as claimed, for its presumed patentability. Subcombination claim ~ sets forth ~. Combination claim ~ does not set forth these particulars and, consequently, does not require them for patentability. Even if other combination claims *do* set forth these particulars, distinction between the *inventions* is shown if any one combination claim does not include the particulars of any one subcombination claim. The presence of the particulars in other combination claims indicates that they *may be* included as part of the combination, but the claims selected above provide evidence that the particulars are not *required*. (See MPEP 806.05(c),

Example 3.) The subcombinations have separate utility because each can be used in packaging operations without the rest of the combination and without the other subcombination ~.

The inventions of Groups I and II are related as **subcombinations disclosed as useable together in a single combination**. The subcombinations are distinct from each other if they are shown to be separately useable. In the instant case, the invention of Groups I and II have separate utility because each can be used without the specifics of the structure set forth in the claims of the other Group (See MPEP 806.05(d)).

It should be noted that in a comparison of the independent claims of the two subcombinations, each of the claims provides evidence that it does not require the particulars of the other subcombination for its presumed patentability. Even if other claims *do* set forth these particulars, distinction between the *inventions* is shown if one subcombination claim does not include the particulars of the other subcombination claim. The presence of the particulars in the dependent claims indicates that they *may be* included as part of the combination, but the independent claims without those particulars provide evidence that the particulars are not *required*. (See MPEP 806.05(c), Example 3.)

Applicant is reminded that, upon cancellation of claims to a non-elected invention, the **inventorship must be amended** in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h). Applicant should further **amend the title**, in necessary, to reflect the elected invention.
